Vertical Summit Phontage Softphone

Included with every Vertical Summit™ unified communications system are two free licenses for the built-in Phontage Deluxe PC softphone. The intuitive Phontage user interface provides easy, one-click access to the Summit's powerful feature set and applications, including a Phonebook database, for seamless communication and enhanced collaboration.

Phontage integrates with standard database management software including ACT!, GoldMine and Microsoft® Outlook™, so you can automatically synchronize contacts and your Outlook calendar for simple Phonebook and call log management and click-to-call dialing. Pop-up call details let you see who's calling before picking up the handset; view your call history at a glance; and send and receive secure SMS messages. For true collaborative multimedia communication, the Phontage Deluxe version also includes video conferencing, instant messaging, call recording and application and file sharing.

The Phontage PC softphone included with the Vertical Summit provides high quality voice and video communications.
